Software Engineer | Web Developer

Skills

HTML	Bootstrap	JQuery	Javascript	Python	Mongoose	Trello
CSS/Sass	Materialize	Node.js	React	Django	MongoDB	Git	GitHub
Web Application	WordPress	Express	Restful API	Heroku	PostgreSQL	Figma

Professional Experience

Software Engineer Immersive Fellow   **General Assembly - Boston MA**   **06/2020 - 09/2020**

Full time 500+ hours, 12 weeks software engineering immersive program where I designed and implemented multiple full-stack applications from the ground up using MVC frameworks and object-oriented programming with goals of code abstraction. I also built quality RESTful APIs, integrating data from third-party APIs, and worked closely with development team members during a group project.

- Snippets Application

It is a cool full-stack app created to help developers storage their snippets of code. It uses the following technologies, Boostrap, Express, Ajax Passport, mongoDB and it is hosted on Heroku.

- JobLogger Project

A full-stack React application where users can create logs of personal jobs that they have applied during the job search. The stack used for this project was Express, React, and MongoDB.

- Tic Tac Project

A a single page application created using the following technologies. HTML, SCSS, Bootstrap, Javascript jQuery, and an external API and user authentication.

Web Developer | Self Employed

Web Developer   **Self Employed - Boston**   **01/2015 - 02/2020**

Integrated third party forms, data, back-end services and specialized content to personalize WordPress theme layout following project scope and outlined content guidelines for each project. Applied strong writing, editing and proofreading to produce the best possible content.

- Boston Twentieth Century

This is a full-stack e-commerce website built in using WordPress and Woo-commerce, the online store has about 500 items and a shipping functionality for sale across all US.

- Totally Wired Sculpture

An e-commerce website created used WordPress and E-commerce to sell wired sculpture across the US. The design and initial scratch for this website was made on figma.

- ToRo Music Player

A fun project created using HTML5, SCSS, vanilla JavaScript and the audio web API, a clean way to keep all your music in one place, and listen to whenever you like it.

Co-Founder of Atus Tecnologia & Comunicação

I was responsible to manage the communication between the company and future new business flourishing a network within the business community, attending events to position the company, and drive new business to our platform.
